 - Szymon Świącki – “Cloud services’ architecture - intro to AWS”
- 2017-03-28
 - Michał Jura – “Orchestrating Docker containers by Kubernetes”
 - place for your DevOps presentation

Today's presentations

Michał Łowicki - Advanced Mesos and Marathon

Advanced Mesos and Marathon! ...sounds scary but it should not!

- monitoring & incidents management
- Jogging - load balancing based on Nginx and Nixy and ...how we ended with proprietary LB solution
- develop, debug & release Docker-based applications

Tomasz Tarczyński - Monitoring as a Service

How Gigaset evolved its monitoring to a “as a service” approach.

Will touch on infrastructure as code with puppet and fault detection with sensu.

Enjoy...
