- prelections
- contests with rewards
- knowledge sharing
- pizza / grill / beer and so on
- lot of fun and joy

- ...around 27.07.2019 (Saturday)

"The Day with DevOps" at DataArt

We need your DevOps presentations to make this event happen :)

News / info:
github.com/devopswroclaw

Agenda

- 18:05 – Group updates/news/announcements
- 18:10 - "DevOps Engineer - what does it really mean" by Paweł Gronkiewicz from Zoovu
- 19:00 - "Kubernetes Config Management: Helm + GitOps" by Tomasz Tarczyński from Gigaset
- 20:00 - pizza and mingle time

Today's presentation

Paweł Gronkiewicz - "DevOps Engineer - what does it really mean"

- explain who the DevOps Engineer is
- what is the role of DevOps Engineer in an Organization
- how to collaborate between "Ops" and "Dev"

Tomasz Tarczyński - "Kubernetes Config Management: Helm + GitOps"

- Helm helps organizing the configs into charts, template them, and manage releases...
- ...GitOps lets you use a git repo as a single source of truth for the desired state of the whole system...
- ...then all changes to this state are delivered as *git commits* instead of using *kubectl apply* or *helm upgrade*...

Enjoy...
